

General

The Burrel+ service is a convenient application for the deployment and management of Burrel trail cameras. With the application, you can easily deploy a Burrel trail camera and manage the camera remotely whenever and wherever. The application receives the photographs and video recordings taken by your camera and saves them securely on the Burrel+ service. When you use the application, you can easily find your photographs in a single location and download them to your phone or share them with your friends. If you wish, the Burrel+ service can forward the images to your email. The application allows you to make the most of your Burrel camera. You can register for the Burrel+ service easily at burrelplus.com.

Key features:

- A single application to manage Burrel cameras
- Easy remote deployment
- Manage multiple cameras
- Media gallery
- Easy and versatile remote control

Ordering

You can order the Burrel+ service at www.elisa.fi/burrelplus. The service can be ordered either with or without a subscription

Setting up and using the service

After you have ordered the service, you will receive the installation link in an SMS message and an email. You can deploy the Burrel+ service after you have ordered it by activating your account at www.burrelplus.com and downloading the application. The application will guide you through the deployment of the service. You can use the service through the mobile application or an internet browser.

Instructions for the deployment and use of the service are available at www.elisa.fi/burrelplus.
